LUBRICATION NOTES:
Type 'J' Grease
No. 49-08-4220, 1 lb. can

NOTE: When servicing, remove 90-95% of existing grease prior to installing Type 'J'. Original grease may be similar in color but may not be compatible with 'J'. Prior to reinstalling, clean gear assemblies with a clean, dry cloth. Lightly coat all parts highlighted here with 'J' grease. Apply a greater amount of grease to all internal and external gear teeth.

Bit Holder on M12™ Products

Bit Holder on M18™ Products

49-16-3697 BIT HOLDER (ACCESSORY)

FIG.	PART NO.	DESCRIPTION OF PART

61	06-82-3008	6-32 x 12.7mm Pan Hd. Philips Screw	Bit Holder	16±2	13.88±2

As an aid to reassembly, take notice of wire routings and position in wire guides and traps while dismantling the tool.

1. Ensure Light Pipe is installed. Install Gearcase into the handle half. Press the wires of the Shadowless LED into the grooves of the gearcase and in the traps.
2. Route Mode Select Board wires in the groove, then insert the control board in the housing. Shadowless LED wires go under the Mode Select Board wires.
3. Route Mode Select Board wires in the groove, then insert the control board in the housing. Shadowless LED wires go under the Mode Select Board wires.

4. Install ground wire terminal and press the ground wire into the grooves of the housing support, ensuring wires are pressed down completely in each trap. Install B+ wire under the B- wire and through the housing groove. Install trigger wire. Ensure wires are clear of the screw bosses.

Prior to installing Cover (Right Handle Halve), check that all electrical components are seated firmly and squarely in the handle cavities. Be sure all wires and connectors are tucked in place and are not interfering with the trigger movement of the Forward/Reverse Shuttle. Be sure wires are not going to be pinched.

Before securing Cover (Right Handle Halve) onto Support (Left Handle Halve), check for proper functionality of the trigger as well as the Forward/Reverse Shuttle.

Install battery and depress switch trigger to assure tool is operating properly.
